

Meeting of European activists against geo engineering at the European Parliament in Brussels on April 8th/9th 2013. Organized by the initiative “Skyguards” – The Greens/European Free Alliance in the European Parliament – discussing the topic:

„BEYOND THEORIES OF WEATHER MODIFICATION – CIVIL SOCIETY VERSUS GEOENGINEERING“

Report: Claudia von Werlhof

Here, to begin with, the information about the meeting sent by one of the participants after the conference:

Press release

<http://tinyurl.com/2013sgconf>

48 activists from Cyprus to Sweden and from the Ukraine to Belgium gathered for this event at the European Parliament (EP) on April 8th and 9th in Brussels.

On the evening of April 8th we gathered in the „Petra Kelly“ room of the European Parliament to watch the film **„Why in the world are they spraying?“** (see link 1, I also have the DVD) and to engage in a discussion about the content together with Michael Murphy/USA, producer of the movie. A second film titled „What in the world are they spraying?“ has been completed as well.

The main topic of the film revolves around ozone depletion, forest decline, the completely changed composition of the soil after 5-6 years of spraying, global darkening due to the blockage of sunlight (simulation of the situation after a huge volcanic eruption), and ramifications such as Alzheimer, Autism, Asthma, and allergies caused by the 20 million tons of aluminum now in the atmosphere.

Geo engineering means: to tamper with the atmosphere, the blue of planet earth. This means to modify the weather (R. Peterson), including a patent on the artificial production of ice, that can be emitted via spraying. In this manner especially food production will become alienated. Among other things, HAARP works with aerial sprayings. War has always been closely tied to weather. This is the origin of the interest in weather manipulations which essentially transforms all of us into the „enemy“. Weather functions as a multiplier of deployed forces (US Air-Force: „Weather as Force Multiplier. Owning the Weather in 2025“). Hurricanes can be utilized as „guided weapons“, the same goes for the manipulation of the jet stream in the atmosphere. Harvests can be destroyed. The most efficient „secret warfare“ takes place through the environment itself (Begich). The UN ENMOD Convention (1977) has warned early on about „small input with a large output“ when utilizing nature’s forces.

What is at stake as well is a way to control the market: 80% of the US economy is dependent on the weather, and “weather derivatives” are now in existence at stock markets; this means that weather

and technologies to modify the weather are already traded on the markets. Weather technologies pose new options for investors to draw higher profits while food prices rise.

- *This is business through the destruction of the earth and of life; new ways of warfare...Didn't Rosalie Bertell state that weapons used in new wars are different from those utilized in previous wars? And so economy, technology, and war merge into one single global event...*

Further correlations between HAARP and aerial sprayings: The heating of the ionosphere can lead to a change in air pressure. Dispersing aerosols works best in calm high pressure weather.

The investor George Soros has supposedly bought a lot of farmland in regions given up by local farmers. Organic farmers complain about the quality of the food they grow, it is not as healthy anymore, doesn't taste as good as it used to, and even looks different. Production has decreased by 60%. A stable micro climate has ceased to exist. A decrease in the growth of crops is observable as more and more plants fall victim to fungi. Abiotic stress potentially caused by flooding and drought as well as a decline in the quality of the soil is a possible reason (the US Midwest produces 40% of grain globally). Water and food are most impacted. We inhale metals...

Creation has been brought under the control of corporations. However, we cannot be the creators ourselves (B. Petersen) and create an artificial environment to substitute the natural one!

- *This is what I call the modern "alquimical" transformation of nature and life, trying to become independent from it by replacing it by its opposite – the delusion of patriarchy!*

Apparently spraying activity took place 5 days before the great storms. Bill Gates invests large amounts of money in geo engineering, which destroys the earth. Meanwhile we deal with weather as a commodity, disaster capitalism, and anthropogenic climate change – control of the weather means nothing less than controlling the planet...

On April 9th from 9-11 AM a roundtable discussion took place in the same conference room of the European Parliament. This meeting was chaired by MEP Tatjana Zdanoka (Committee on Civil Liberties, Justice and Home Affairs). The program had been changed several times. Finally 19 short presentations were scheduled of which 12 actually took place. Due to the unanticipated contributions by two additional politicians of the Greens we ran short on time. Since the room had to be vacated at 11 AM, the final contribution (see the attachment), which was meant to be my 3 minute homage to Rosalie Bertell – who had taken part in preparing the first meeting in the EP in 1999, a year before her book Planet Earth was published – was cancelled just when I was preparing to speak. (Meanwhile I have received a written apology by the organizers).

Due to the excellent contributions and engagement of the prior speakers, the cancellation wasn't too much of a problem, especially since almost all important topics had been covered – a missing piece may have been an analysis of "military alchemy", however, this would probably not have been comprehensive (yet) at this point.

As a matter of fact, the meeting of the EP in 1999 led to no consequences since the EU Commission declared itself to be incompetent due to the military nature of HAARP. This is especially interesting in the light of contradicting statements about the radar facility in Alaska; it has actually been classified

as a mostly civilian research project that has been experimenting with electromagnetic waves in the ionosphere since the 1990ies.

So, the cat had been let out of the bag. However, now, at the meeting 14 years later nobody assumed that there was a peaceful and civilian objective regarding the topic at all, and based on our own observations, i.e. the aerial spraying, also called “chemtrails” – a term used by the military.

The reports and contributions on April 9th left no doubt. The beginnings of this history can be traced back to the development and deployment of weather weapons (Hall) as they were utilized in the Vietnam War. Today they are summarized by the term “geo engineering”. There is no doubt that this is a military science that has no connection whatsoever to climate protection (Johnson). Initially the Green speaker (MEP Schulz) still had quoted the generally acknowledged thesis broadcasted by the media, which states that geo engineering proposes a method to save the planet from climate collapse.

- *Meanwhile, however, the military itself does not even assume climate change, as we now know from Bertell's book (Hamilton in Bertell 2011). Rather, the effects that we ascribe to the change in climate are generated through manipulation of the weather and interference in the occurrences in nature and of the earth by means of geo engineering and facilities similar to HAARP, that now exist everywhere on the planet and represent a major cause for these changes.*

In this connection we heard a report about a new facility of this kind, MUOS, which is currently under construction in Sicily (Chiesa). The fact that this facility is a NATO base positions it beyond any control of the Italian government. The objective is the intensification of similar activities with EM waves and the establishment of strategic locations in connection to satellite systems globally.

However, not only the military is involved. Photographs prove that commercial discount airlines such as Ryanair, Easyjet and Air Berlin are spraying as well. The connection to HAARP like activities is a potential utilization of these trails as conductors for EM waves (Henrion). For these activities to be undertaken by military jets a deregulation contract for air traffic in Europe would have been necessary. Besides of all this, the question about why polymers are dumped into the air was raised, knowing that they endanger life directly. It was asked what the effects of a darkening of the sky will mean for photosynthesis, the water cycle, and our nutrition. Consequences in connection to our food through the spraying of air, water and soil with aluminum, barium, and strontium (proven components of sprayings) are signs of deficiencies (Röver) directly linked to an increase in health risks due to the inability of the body to decompose the particles or metabolize the substances. Nano particles of these substances can travel through all organs, including the brain and can eventually cause cancer. There is a potential of synergy effects between Barium and Aluminum, further, Aluminum has the ability to make us more susceptible to HAARP activities!

- *This would constitute a real basis for “mind control” through EM waves.*

Cumulating effects of these substances could potentially reduce our intelligence by 15%. Illnesses such as Morgellons syndrome (caused by polymers) are increasing (2 victims of this disease were present), however, these have not been medically recognized as such, they are assumed to be a mental disorder more closely linked to psychopathology. Secret dispersion of toxic substances must

be stopped at all costs. For, this concerns our descendants as well. But, „**You don't know that you don't know!**“

New forms of state terror and criminalization in connection to natural disasters have become evident (Alfonsi) and geo engineering only adds to other problems such as the erosion of soil, chemicals in agriculture, deforestation and the effects of nuclear radiation (Tsybukh).

Demands were brought forth that the EP concerns itself with these questions (Fraile) due to the interpretation that these activities constitute civil rights violations of Europeans. After all, we have the European Charta and the UN Human Rights Charta. Millions of individuals are affected, therefore the absolute need for a public debate. Compensation mechanisms and means of democratic control over military research need to be thought through. April 9th 2013 was declared as “European Citizen's Day”. 2013 is “The year of the air above Europe”!

After the recognition of former MEP Mai Theorin (Leblanc) who was responsible for the EP meeting in 1999, it was my turn to present a short memorial speech for Rosalie Bertell, however, that did not take place.

After the round table we changed meeting rooms in order to attend a scheduled **press conference** (2nd link).

As expected, no press, other than the journalists who were a part of the group, was present. US movie maker Murphy concluded that we must reclaim the power of the press ourselves. Geo engineering, he says, continues at the same rate, the sunrays are being blocked out, the food crisis is volatile, 35% of native forests are damaged, and 1.000 children are dying every hour due to these programs.

Scientific evidence for the real execution of geo engineering projects is being collected (Messenger). The actual situation does not just constitute simply an academic problem as discussed by geo engineers and Pat Mooney (ETC-Group) f. e., rather, it has become a very real problem that affects absolutely everything (Hall). All of it is organically traceable. Reality is that we are confronted with “a real conspiracy up in the skies” rather than us being the conspiracy theorists (Veerecke). Therefore, the EU must take over responsibility.

In addition, the culprits act without any knowledge about the complexity of eco systems (Chiesa).

- *This is precisely what Rosalie criticized: The atmosphere is being destroyed without even having previously come to an understanding of its ways of functioning!*

In order to avoid political compromising a committee that utilizes highly scientific methods and individuals should now be formed.

I suggest a publication of the contributions in the form of a founding document of a new international movement against geo engineering and a campaign against the geo technical prevention of spring 2013 in Europe that is still underway. We will see what will happen.

For, this killing of spring is something I witnessed myself during my discount flight from Munich via Copenhagen to Brussels on April, 8th. Hopefully without spraying from our aircraft!

A flight over Europe, the dark continent of the spring of 2013

We are flying towards the thick and dirty white blanket that spans Europe from Spain to Moscow since weeks (inf. by K. Dörr), and that possibly constitutes a large scale military experiment affecting or rather, damaging European agriculture. Closely beneath this cover I spot sprayed trails sticking together in dense plumes while forming this blanket. We enter into this hundreds of meters to 1 km thick layer. Just outside my window, there are sprayed trails, almost within my grasp as we fly parallel to them. We cross the path of another plane that has left behind a grayish-brown trail. At that moment our entire plane vibrates and makes a cracking sound! What other evidence do we need to understand that we are dealing with sprayed trails and not just with contrails (hydrogen vapor trails)? I raise the topic to the stewardess. She has no clue. Another stewardess joins us. I explain the situation and the dangers to all humans, animals, and plants on earth, and that I am on my way to a meeting at the EP in Brussels which will address this topic. Excitedly they disappear to inform the captain who had radioed ground control for clarification about the bang. Apparently, he had never heard the term chemtrail before. Then we rise above the white layer. It looks like a vast ocean. In the distant horizon further airplanes with tails of thick brown trails can be observed, like ships cruising through the whitish waters. The sight makes me sick. During our descent I spot occasional openings in the layer. They are filled by a grayish opaque mass resembling an obscure shroud spread over the land. Blurry fields of snow are visible over Northern Germany; winter has not departed due to the spraying. The spook is over as soon as we reach Danish skies. The sun is shining from a bright blue sky. While leaving the aircraft I hand my business card to the stewardess.

Today, as I complete this report on April 17th, spring has begun; finally some warmth, however, the skies are completely sprayed and the sun is only visible indirectly, the light is weak...the experiment not over yet! (on June 3rd reviewing this translation we have had another 2 months of near winter in the middle of spring).

Documentation:

Werner Altnickel, the only German participant, whom I have not been able to meet personally before (he is the author of the epilogue in the German version of Planet Earth), has filmed the entire event and conducted a videotaped interview with me about PMME and its founding which will be accessible at www.chemtrail.de. Unfortunately, Dominik Storr, the civil attorney against aerial spraying, did not come to Brussels. Meanwhile, the participants of this historical meeting are connected through a network in which they exchange documents.

The speech in memoriam Rosalie Bertell, not held at the meeting but distributed in English, German and French in the meanwhile:

European Parliament, Brussels, 9.4.2013: „Skyguards“-Conference „Beyond Theories of Weather Modification“ 8/9.4.2013 (The Greens / European Free Alliance in the European Parliament)

Hommage for Dr. Rosalie Bertell

by Prof. em. Dr. Claudia von Werlhof, Austria (speech that could not be held due to time constraints)

Rosalie Bertell has helped to organize the first meeting of this type in the European Parliament in 1999, one year before her book about the development of military technologies appeared, „Planet Earth. The Latest Weapon of War“. Nearly nobody seems to have read it, though, because the book was never properly distributed.

I myself read it in 2010 and we founded the „Planetary Movement for Mother Earth“ in Germany, translated Bertell's book into German and published it as an updated version with new texts from Bertell herself and others, „Kriegswaffe Planet Erde“. A Spanish translation is going to appear in Mexico soon and we need a publisher for the 2nd English version.

Bertell, born in the US, died last year at the age of 83. She was incredibly engaged as an internationally active scientist, an expert witness of the United Nations, founder of various international institutions, a lifelong member of the Order of the „Grey Nuns of the Sacred Heart“, Pennsylvania, and a worldwide known eco-feminist: a courageous fighter during decades for public health and for Mother Earth, the living cosmic being she loved so much!

Between other awards Bertell got the Right Livelihood Award in 1986 for her unique work about the dangers of nuclear radiation – „No immediate Danger? The Future of a Radioactive Earth“, 1985, one year before the nuclear accident at Chernobyl.

In „Planet Earth“ she is documenting the development of new military technologies in nuclear and post-nuclear planetary dimensions in East and West after WWII, a period of 60 years. She is defining them as „plasma weapons, weather war and geoengineering“.

The „Tesla-weapons“ are functioning mostly via pulsed electromagnetic waves that are able to originate earthquakes, Tsunamis, volcanic eruptions, draughts, floods and other changes in the weather as well as in the ocean currents all over the Planet. Since 1974, for instance, they seem to have been applied in order to melt down the Arctic. (The existence of these technologies was already described in the UN-ENMOD-Convention of 1977, calling for a ban on their hostile use.)

Today, Rosalie perhaps would have liked to say:

The present ongoing weeks long weather war with Chemtrails over the whole of Europe proves that greenhouse gases are NOT the real cause for climate change. It is the military experimentation of decades that is causing seemingly „natural“ changes and catastrophes. Mother Earth has already been turned into a mega-weapon, threatening not only survival conditions, but also the life systems of the Earth themselves, so that our Planet has already been severely damaged, and that before we really know how it is indeed functioning. Geoengineering, therefore, does not „save“ the earth. On the contrary, the propagation of civil geoengineering today is only hiding the military activities behind, that aim at taking control and power over the whole Planet, putting it at risk consciously and irresponsibly.

We, the people, cannot tolerate the military to continue to wage a secret war on and against our Planet, behaving like „God“ and destroying life, the Blue of our atmosphere and Mother Earth herself. Such a criminal and diabolical undertaking of dimensions never heard of has to STOP immediately!
